INDEPENDENT AUDITOR'S REPORT

Honorable President and Members of the Village Council Village of Ontonagon Ontonagon, Michigan

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Village of Ontonagon as of and for the year then ended March 31, 2005, which collectively comprise the Village's basic financial statements as listed in the table of contents. These financial statements are the responsibility of Village of Ontonagon's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Village of Ontonagon as of March 31, 2005, and the results of its operations for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued a report dated September 7, 2005 on our consideration of Village of Ontonagon's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants.

The management's discussion and analysis and budgetary comparison information on pages 6 through 13 and 37, are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express any opinion on it.

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise Village of Ontonagon's basic financial statements. The combining and individual non-major fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Other Supplemental Financial Information listed in the table of contents and the accompanying schedule of expenditures of federal awards as required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* are presented for the purposes of additional analysis and are not a required part of the general purpose financial statements of the Village of Ontonagon. The combining and individual non-major fund financial statements and the schedule of expenditures of federal awards have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

September 7, 2005

Certified Public Accountants

Bruce A. Rukhila, CPA, PC

This section of the Village of Ontonagon's annual Financial Report presents the Management Discussion and Analysis of the Village's financial activities during the fiscal year ended March 31, 2005. The analysis focuses on the Village's financial performance as a whole. It is intended to be read as part of the Village's financial statements, which immediately follow this section.

Because the Village of Ontonagon is implementing new reporting standards for this fiscal year with significant changes in content and structure, much of the information is not easily comparable to prior years. However, in future years, comparisons will be more meaningful and will go further in explaining the Village's financial position and results of operations.

Financial Highlights

The Village of Ontonagon budgeted funds ended the year within budget. Total expenses for governmental activities totaled \$1.9 million, this includes the M-64 Bridge project. Total expenses for business-type activities totaled \$1.7 million. The year end fund balance for the General Fund was \$607,560. The Water Fund, while still under stress, is improving its financial position.

Overview of the Financial Statements

The annual report consists of a series of financial statements including other requirements as follows:

- Management's Discussion and Analysis introduces the basic financial statements and provides an analytical overview of the Village's financial activities.
- The Government-wide Financial Statements consists of a Statement of Net Assets and a Statement of Activities. These provide information about the activities of the Village as a whole and represent an overall view of the Village's finances.

Statement of Net Assets and the Statement of Activities

These statements provide information that help determine how the Village is doing financially as a result of the year's activities. The statements are shown using a full accrual basis.

The Village's net assets and the changes in the net assets during the year are reported by these two statements. Increases or decreases in the Village's net assets is one way to determine if the financial position of the Village is improving or deteriorating. However, non-financial factors will need to be considered as well to determine the overall financial position of the Village.

There are two kinds of activities in the Statement of Net Assets and the Statement of Activities:

<u>Governmental Activities</u> - Most of the Village's basic services are reported here, including general administration, fire, public works, and parks and recreation. These activities are financed primarily by property taxes, intergovernmental revenues, and charges for services.

Overview of the Financial Statements - Continued

Major Funds: Under GASB Statement 34, the audit focus has shifted from governmental type funds to major funds. Major funds are the largest funds in terms of assets, liabilities, revenues or expenses/expenditures. This allows the reader to see more detailed activity of the major funds. For the Village of Ontonagon, the following funds meet this requirement:

- General Fund
- Capital Projects M-64 Bridge project

Non-major Funds: In the basic financial statements, non-major funds are consolidated into one column. These are smaller, less active funds. Detailed information about non-major funds can be found after the notes to the financial statements.

<u>Business-Type Activities</u> - The Village's sewer and water activities are reported here. A fee is charged to customers to help defray the cost of these services.

- Fund Financial Statements tell how governmental services were financed in the short term as well as what remains for future spending. These statements also report the Village's operations in more detail than the Government-wide Financial Statements by providing information about the most significant funds.
- Notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the basic financial statements.
- Required supplementary information, other than Management Discussion and Analysis, provides information about the required budgetary comparison information.
- Other supplementary information provides detailed information about the General Fund, Special Revenue Funds, and Proprietary Funds.

Governmental Funds - The Village's basic services are mainly reported in this type of fund, which concentrates on how money goes into and out of those funds and the balances left at year end that are available for spending. Modified accrual accounting is the reporting method used for these funds. These statements provide a short-term view of the Village's general governmental operations and the basic services it provides in detail. Information in these statements help determine whether there are more or fewer financial resources that can be spent in the future to finance the Village's programs.

Governmental funds are essentially the same as the governmental activities with the exception that internal services are included in governmental activities but not as governmental funds. Governmental funds use a modified accrual basis of accounting and focus on near-term inflows and outflows of spendable resources and on the balances of spendable resources.

In governmental funds, capital outlay and debt principal are reported on the Statement of Revenues, Expenditures and Changes in Fund Balance and depreciation is not recorded. The rule for reporting accrued vacation is more restrictive. The Balance Sheet for governmental funds does not include any capital assets or long-term debt.

Overview of the Financial Statements - Continued

<u>Proprietary Funds</u> - Proprietary funds use a full accrual method of accounting for both government-wide statements and fund level statements. There are two types of proprietary funds.

Enterprise funds are used to report business like activities. In general, these funds charge a fee for their services. The Village uses enterprise funds for water and sewer. Proprietary funds are reported in the same way that all activities are reported in the Statement of Net Assets and the Statement of Activities. The Village's enterprise funds are the same as the business-type activities we report in the government-wide statements but provide more detail and additional information, such as cash flows for proprietary funds. All enterprise funds qualify as major funds.

Internal service funds provide services to other Village activities or functions. Internal service funds facilitate cost allocation of centralized services such as vehicle and equipment maintenance. The Village of Ontonagon Equipment Fund is the only internal service fund.

<u>Component Units</u> - The Village has two component units. Component units are separate legal entities for which the Village has some level of financial accountability. Component units are shown in a separate column. The Village of Ontonagon's component units including Ontonagon Memorial Hospital and the Downtown Development Authority. More information about the component units can be found in the Notes.

The following two charts highlight the Village's governmental activities by revenues and expenses.

Revenues-Governmental Activities

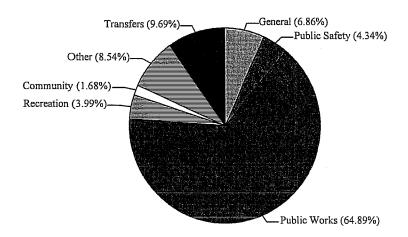

Village of Ontonagon Management's Discussion and Analysis March 31, 2005

The most significant portions of the revenues for all governmental activities of the Village comes from property taxes and the M-64 grant revenues. The Village's operating millage was 12.50. The Village charter allows the Village to levy up to 20.0 mills for operations.

The federal and state revenue represents state shared revenue and funds for the Major and Local Street Funds from the Michigan Transportation Fund.

Expenses-Governmental Activities

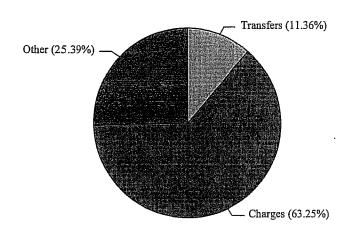

The general area expenses represent village hall activities. The major, local and road expenses are included in the public works area. Marina expenses are included in the recreation.

1.00

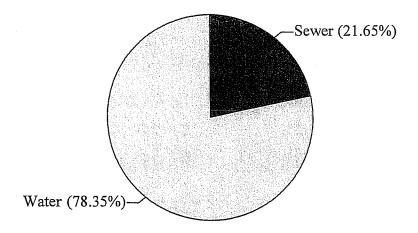

The following two charts highlight the Village's business-type activities by revenues and expenses.

Revenues-Enterprise Funds

The "Other" Revenue is mainly from the settlement of a lawsuit, and is an unusual and one-time occurrence.

Expenditures-Enterprise Funds

Financial Analysis

<u>Governmental Funds:</u> The focus of the Village's governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. Such information is useful in assessing the Village's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the Village's governmental funds reported combined unreserved fund balances of \$1,208,594.

The General Fund is the main operating fund of the Village. At the end of the current fiscal year, unreserved fund balance of the General Fund was \$607,560. As a measure of the General Fund's liquidity, it may be useful to compare both unreserved fund balance to total fund expenditures. Unreserved fund balance represents 81% of total General Fund expenditures.

The fund balance of the Village's General Fund decreased by \$62,274 during the fiscal year. Key elements of this decrease are the reduction of state shared revenues and the increase in the cost of employee benefits.

<u>Proprietary Funds:</u> The Village's proprietary funds provides the same type of information found in the government-wide financial statements, but in more detail.

Fund equity at the end of the year amounted to \$23,435,640. Of this amount, \$607,734 was invested in capital assets, net of related debt, \$12,724,298 is contributed capital from federal and state grants, net of amortization, \$718,966 is restricted for debt service and \$297,123 was unrestricted.

Budgetary Highlights

During the year ended March 31, 2005, the Village amended the budget twice. The amendments were done to cover unbudgeted expenditures. The amendments were mainly required to reconcile actual versus budgeted level effort required for various maintenance activities in the different funds.

Capital Assets and Debt Administration

The Village's investment in capital assets for the governmental and business-type activities as of March 31, 2005, amounts to \$30,125,571. This investment in capital assets including land, buildings, improvements, machinery and equipment. There was an addition to the water fund assets representing the final costs on the water project in the amount of \$46,917. The equipment fund purchased a plow truck/sander in the amount \$23,500.

Additional information on the Village's capital assets can be found starting on page 27 of this report.

Capital Assets and Debt Administration - Continued

Long-term debt: At the end of the current fiscal year, the Village had total debt of \$10,620,520. This total amount is backed by the full faith and credit of the Village. The Village's total debt increased by \$200,000 during the fiscal year due to refunding of the USDA-Rural Development water bonds. The Village refunded these water bonds with Michigan Municipal Bond Authority to take advantage of a lower interest rate and a shorter term. The new bonds have an interest rate of 2.125% versus the 4.5% and 4.25% interest rate on the original bonds. The new bonds have a term of 30 years versus the 40 year term of the original bonds. The expected savings in interest expenses over the 29 years is estimated at 4.9 million.

Additional information on the Village's long-term debt can be found starting page 29 of this report.

Request for Information

This financial report is designed to provide our citizens, taxpayers, customers, investors and creditors with a general overview of the Village's finances. If you have questions about this report or need additional information, contact the Village Manager at 315 Quartz Street, Ontonagon, Michigan 49953 or call 906-884-2305.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the Village of Ontonagon, Michigan, conform to generally accepted accounting principles for local governmental units as prescribed by the Governmental Accounting Standards Board and the American Institute of Certified Public Accountants. The following is a summary of the more significant policies:

IMPLEMENTATION OF GASB STATEMENT NO. 34

Effective April 1, 2004, the Village implemented the provisions of Governmental Accounting Standards Board Statement No. 34, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments* (GASB No. 34).

The primary changes from the prior years' financial presentations include:

- A Management's Discussion and Analysis (MD&A) section providing analysis of the Village's overall financial position and results of operations has been included.
- Government-wide financial statements (statement of net assets and statement of activities) prepared using full accrual accounting for all of the Village's activities have been provided.
- Fixed assets in the governmental activities column of the statement of net assets include assets totaling \$4,232,957 previously reported in the General Fixed Assets Account Group. Fixed assets at April 1, 2004 previously reported in the General Fixed Assets Account Group have been adjusted by \$77,300 to reflect the historical cost of the Village's fixed assets at that date. In addition, the governmental activities column includes bonds and other long term obligations totaling \$315,000 previously reported in the General Long Term Debt Account Group.
- The change to the direct method of reporting cash flows from operations in the proprietary fund financial statements.

REPORTING ENTITY

The Village of Ontonagon is incorporated under the laws of the State of Michigan and operates under an elected council form of government.

As required by generally accepted accounting principles, the financial statements of the reporting entity include those of the Village of Ontonagon (the primary government) and its component units. The component units discussed below are included in the Village's reporting entity because of the significance of their operational or financial relationships with the Village. The criteria and guidelines of the Governmental Accounting Standards Board Statement Number 14 *The Reporting Entity* are utilized to determine that all applicable entities are included in the combined financial statements of the Village. The primary criterion for inclusion is the degree of oversight responsibility over such entities by the Village's elected officials. This responsibility includes financial interdependency, selection of governing authority, selection of management, ability to significantly influence operations, and accountability for fiscal matters. Additional criteria that are considered even if there is no significant oversight responsibility are an entity's scope of public service and special financing relationships between a particular agency and the reporting entity.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Based upon the application of these criteria, the following is a brief review of each potential component unit addressed in defining the government's reporting entity:

Ontonagon Memorial Hospital - the hospital is owned by the Village of Ontonagon. The Village is financially accountable for the hospital. The hospital, therefore, is included in these financial statements using the "discrete presentation method."

<u>Downtown Development Authority</u> - the Downtown Development Authority (DDA) is a separate legal entity; however, the Village is financially accountable for the DDA. Therefore, the DDA is included with the Village financial statements using the "discrete presentation method."

Ontonagon Housing Commission - the Village is not financially accountable for the Housing Commission nor does it have a significant relationship. Therefore, the Housing Commission is not included as part of the Village reporting entity.

The Ontonagon Memorial Hospital and the Ontonagon Housing Commission are audited separately by other auditors. These audits are under separate cover. Copies of these audits may be obtained from the Ontonagon Village manager.

DISCRETELY PRESENTED COMPONENT UNITS

The component units' columns in the combined financial statements include the financial data of the Village's component units, the Ontonagon Memorial Hospital, and the Downtown Development Authority (DDA). These units are reported in a separate column to emphasize that it is legally separate from the Village. Copies of these audits may be obtained from the Ontonagon Village manager.

MEASUREMENT FOCUS, BASIS OF ACCOUNTING AND FINANCIAL STATEMENT PRESENTATION

<u>Government-Wide Financial Statements</u> - The statement of net assets and the statement of activities display information about the Village as a whole. These statements distinguish between activities that are governmental and those that are considered business-type. These statements exclude fiduciary activities such as pension and agency funds.

The government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting as further defined under proprietary funds below. This is the same approach used in the preparation of the proprietary fund financial statements but differs from the manner in which governmental fund financial statements are prepared. Therefore, governmental fund financial statements include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the statements of governmental funds.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The government-wide statement of activities presents a comparison between expenses and program revenues for each different identifiable activity of the business-type activities of the Village and for each governmental program. Expenses are those that are specifically associated with a service or program and are therefore clearly identifiable to a particular function. Program revenues include charges paid by the recipients of the goods or services offered by the programs and grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Revenues which are not classified as program revenues are presented as general revenues. The comparison of program revenues and expenses identifies the extent to which each function is self-financing or draws from the general revenues of the Village.

Internal activity is limited to interfund transfers which are eliminated to avoid "doubling up" revenues and expenses. Net assets are reported as restricted when constraints placed on net asset use are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or imposed by law through constitutional provisions or enabling legislation. The net assets restricted for other purposes result from special revenue and capital projects and the restrictions on their net asset use.

<u>Fund Financial Statements</u> - Fund financial statements report detailed information about the Village. The focus of governmental and enterprise fund financial statements is on major funds rather than reporting funds by type. Each major fund is presented in a separate column. The two major governmental funds are each presented in a single column on the governmental fund financial statements.

The Village reports the following major governmental funds:

<u>General Fund</u> - The General Fund is the government's primary operating fund. It is used to account for all financial resources of the general government, except those required to be accounted for in another fund.

<u>Capital Projects (M-64 Bridge)</u> - This fund is accounting for the construction project funded through U.S. Department of Housing and Urban Development - State Programs and passed through from the State of Michigan. The project funds are being administered by the Village and the construction is being performed by the Michigan Department of Transportation.

The Village reports the following proprietary funds:

<u>Enterprise Funds</u> - Enterprise Funds are used to account for operations (a) that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided the periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes. The Water and Sewer Funds are enterprise type funds.

<u>Internal Service Funds</u> - Internal Service Funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the Village or to other governments, on a cost reimbursement basis. The Village maintains one Internal Service Fund, which is the Equipment Fund.

Additionally, the Village reports the following non-major governmental funds: Major Street, Local Street and Road.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

BUDGETARY DATA

The Village follows these procedures in establishing the budgetary data reflected in the financial statements:

- a. In February, the Village Manager submits to the Village Council a proposed operating budget for the fiscal year commencing the following April 1. The operating budget includes proposed expenditures and the means of financing them.
- b. A public hearing is conducted to obtain taxpayer comments.
- c. Prior to April 1, the budget is legally enacted by resolution.
- d. The Village Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the Village Council.
- e. Formal budgetary integration is employed as a management control device during the year for the General Fund and Special Revenue Funds.
- f. Budgets for the General and Special Revenue Funds are adopted on a basis consistent with generally accepted accounting principles.

All budget appropriations lapse at year end. Budgetary amounts reported herein are as originally adopted, or as amended by the Village council throughout the operating year.

In accordance with the State of Michigan Budgeting and Accounting Act, the Village must adopt an annual operating budget for the General and Special Revenue Funds.

ASSETS, LIABILITIES, AND NET ASSETS OR EQUITY

<u>Cash and Cash Equivalents</u> - The Village's cash and cash equivalents include cash on hand, certificates of deposit, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

State statutes authorize the village to invest in U.S. government obligations, certificates of deposit, commercial paper, repurchase agreements, bankers acceptances, and with some restrictions, mutual funds. An Attorney General's opinion states that public funds may not be deposited in financial institutions located in states other than Michigan. The Village does have an investment policy that meets state statutory regulations.

<u>Restricted assets</u> - Certain cash accounts are classified as restricted assets on the balance sheet because their use is limited. In the Enterprise Fund, the "Bond Requirements" accounts are used for the payment of current debt obligations.

<u>Receivables and Payables</u> - In general, outstanding balances between funds are reported as "due to/from other funds."

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

<u>Property Taxes</u> - Property taxes are levied on July 1. The Village collects its own property taxes until September 14, at which time collection is turned over to Ontonagon County for collection.

The tax rate to finance general Village government services for the year ended March 31, 2005, was \$12.50 per \$1,000 of assessed value. At July 1, 2004, taxable valuation was \$33,462,800 which computed to \$389,843 taxes levied. Additional millage was levied county-wide for road improvements which amounted to \$142,351 for the Village Road Fund.

<u>Fixed Assets</u> - Fixed assets, which include land, buildings, equipment, site improvements, and vehicles are reported in the applicable governmental activities column in the district-wide financial statements. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. All costs relating to the construction of facilities are capitalized, including salaries, employee benefits, and bond interest costs. Donated capital assets are recorded at estimated fair market value at the date of donation. Costs of normal repair & maintenance that do not add to the value or materially extend asset lives are not capitalized.

Depreciation on property and equipment is computed using the straight-line method over the estimated useful lives of the related assets.

Buildings and additions 20-50 years

Vehicles and equipment 5-10 years

Furniture and other equipment 5-10 years

<u>Fund Equity</u> - The unreserved fund balances for governmental funds represent the amount available for budgeting future operations. Unreserved retained earnings for proprietary funds represent the net assets available for future operations or distributions. Reserved fund balance for governmental funds represent that portion of fund equity which has been legally segregated for specific purposes and/or does not constitute current available spending resources. Reserved retained earnings for proprietary funds represent the net assets that have been legally identified for specific purposes.

Contributed capital - The Village follows the policy of reducing contributed capital in the equipment, water, and sewer fund for an amount equal to the yearly depreciation on assets acquired or constructed with such contributed capital. This policy is based on the premise that future replacement of these facilities will be funded by the users who benefit from the facilities and not current users through the current rate structure. At March 31, 2005, Federal, State and Local contributed capital of \$14,140,376 has been reduced by an aggregate of \$1,167,298. The current year amortization is \$238,829.

<u>Estimates</u> - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

<u>Encumbrances</u> - Encumbrances are defined as commitments related to unperformed contracts for goods and services. The Village does not record encumbrances in the normal course of operating its accounting system and none are recorded in the accompanying financial statements.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

<u>Compensated Absences</u> - The liability for compensated absences reported in the government-wide statements consist of unpaid sick leave balances. As of March 31, 2005, accrued unpaid sick pay totaled \$52,024. Accrued sick time is payable upon termination of employment or retirement.

<u>Long-term Obligations</u> - In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net assets.

NOTE B - CASH, CASH EQUIVALENTS AND INVESTMENTS

CASH DEPOSITS

<u>Primary Government</u> - At March 31, 2005, the book value of the Village's demand deposits, consisting primarily of checking and savings accounts, certificates of deposit and other cash equivalents, was \$2,422,218 with a corresponding bank balance of \$2,353,545. Qualifying deposits are insured by the Federal Deposit Insurance Corporation up to \$100,000. Of the bank balance, approximately \$1,029,905, representing approximately 44% of the Village's deposits, was covered by Federal Depository Insurance. Michigan law does not require collateralization of government deposits, therefore, only the \$1,029,905 was insured and \$1,323,641 was neither insured or collateralized.

The Village has determined that because of the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all bank deposits. In addition, the laws of the State of Michigan do not provide for collateralization of bank deposits. As a result, the Village evaluates each financial institution it uses and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

Component Units

Downtown Development Authority - At March 31, 2005, the book value of demand deposits, consisting primarily of checking and certificates of deposit, was \$37,995. One hundred percent (100%) of the deposits are insured by the Federal Deposit Insurance Corp. (FDIC) at September 30, 2004, per FDIC regulation number 330.8.

Ontonagon Memorial Hospital - At March 31, 2005, the book value of demand deposits, consisting primarily of checking and certificates of deposit, was \$573,791. One hundred percent (100%) of the Hospital's deposits are insured by the Federal Deposit Insurance Corp. (FDIC) at September 30, 2004, per FDIC regulation number 330.8

INVESTMENTS

Investments are for the component unit, Ontonagon Memorial Hospital, in the amount of \$337,403. Investments consist primarily of cash and certificates of deposits and are stated at fair value.

NOTE C - INTERFUND BALANCES AND TRANSFERS

The amounts of interfund balances at March 31, 2005 are as follows:

Fund	 erfund eivable	Fund	Interfund Payable

Balance	\$	5,934,755	\$	16,448,809	\$ 340,752

NOTE E - RESERVES AND RESTRICTED ASSETS - PROPRIETARY FUNDS

The ordinance authorizing issuance of the 1996 and 1997 Sanitary Sewage Disposal System Revenue Bonds required that specific accounts be established and monies deposited as follows:

Bond and Interest Reserve Account - Quarterly transfers are to be made equal to ½ of the next interest payment due plus ¼ of the next principal payment due.

<u>Sewer Bond Reserve Account</u> - Excess funds of up to \$4,850 per quarter are to be transferred to this account until \$194,000 is accumulated.

The ordinance authorizing issuance of the 2004 General obligation Limited Tax Bonds, require that specific accounts be established and monies deposited as follows:

<u>Water Fund</u> - Quarterly transfers are to be made equal to ½ of the next interest payment due plus ¼ of the next principal payment due placed in the bond reserve account. In addition, the repair, replacement and improvement account will continue to be maintained.

At March 31, 2005, the Village had established these accounts and had restricted cash, as required, as follows:

GENERAL LONG-TERM DEBT ACCOUNT GROUP

1998 Loan of Federal Funds - Payable to Michigan Jobs Commission - On 1998, the Village of Ontonagon entered into a \$315,000 loan contract with the Michigan Jobs Commission for the purpose of Renaissance Zone Industrial Park. The loan was financed at an interest rate of not less than 5% per annum. The maximum term of the loan is 20 years with no interest in the first 5 years. Interest begins to accrue in the 4th year. The debt (up to 90%) will be forgiven at the rate of \$20,000 per job created by the project.

NOTE H - PENSION PLANS

The Village's defined benefit pension plan provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. The Village participates in the Municipal Employees Retirement System of Michigan (MERS), an agent multiple-employer plan administered by the MERS Retirement Board. Act No. 427 of the Public Acts of 1984, as amended, establishes and amends the benefits provisions of the participants in MERS. The Municipal Employees Retirement system of Michigan issues a publicly available financial report that includes financial statements and required supplementary information for MERS. That report may be obtained by writing to the Municipal Employees Retirement system of Michigan, 447 N. Canal Road, Lansing, MI 48917 or by calling (800) 767-6377.

The Village is required to contribute to the plan at an actuarially determined rate. The current rate, as a percent of annual covered payroll, is 13.13% for general employees and 13.97% for administrative employees. Village employees are required to contribute 0% of their annual covered payroll. The contribution requirements of the Village are established and may be amended by the Retirement Board of MERS. The contribution requirements of plan members are established and may be amended by the Village, depending on the MERS contribution program adopted by the Village.

During the fiscal year ended March 31, 2005, the Village of Ontonagon's contributions, totaling \$62,754, were made in accordance with contribution requirements determined by an actuarial valuation of the plan as of December 31, 1998. The employer contribution rate has been determined based on the entry age normal funding method. Under the entry age normal cost funding method, the total employer contribution is comprised of the normal cost plus the level funding method, annual percentage of payroll payment required to amortize the unfunded actuarial accrued liability over 30 years. The employer's normal cost is, for each employee, the level percentage of payroll contribution (from entry age to retirement) required to accumulate sufficient assets at the member's retirement to pay for their projected benefit. Significant actuarial assumptions used include a long-term investment yield rate of 8 percent and annual salary increases of 4.5 percent based on an age related scale to reflect merit, longevity, and promotional salary increases.

NOTE I - DEFERRED COMPENSATION PLAN

The employees of the Village are allowed to contribute on a voluntary basis to a deferred compensation plan through payroll deductions. The plan is made available to all eligible employees by authority of Section 457 of the Internal Revenue Code (IRC), and is administered by PEBSCO. Employees may set aside and invest portions of their current income to meet their financial requirements and supplement their retirement and social security benefits.

Due to changes in the Internal Revenue Code, the Plan's assets are considered to be the property of the Plan's participants and are no longer subject to the Village's general creditors. Also, as the Village relies on a third party for administration and investment management of the plan, the Village is no longer required to report the 457 plan assets on its financial statements.

NOTE J - ONTONAGON MEMORIAL HOSPITAL

As discussed in Note A concerning the reporting entity, the hospital is considered a component unit of the Village of Ontonagon for financial reporting purposes.

The Ontonagon Memorial Hospital is audited by other auditors under a separate cover. The separate audited financial statement contains various notes which detail significant financial disclosures.

The hospital has issued revenue bonds in the name of the Village of Ontonagon. The balance of bonds payable at March 31, 2005 was \$30,000. Additionally, the hospital has capital leases payable of \$551,184, operating leases payable of \$121,464, land contracts payable of \$75,093, and a note payable to a bank of \$192,178.

NOTE K - COMMITMENTS AND CONTINGENCIES

M-64 BRIDGE INFRASTRUCTURE PROJECT

The Village has been awarded a Michigan Community Development Block Grant in the amount of \$5,050,000. The project will allow for the replacement of the existing M-64 swing bridge with a new fixed span bridge over the Ontonagon River within the corporate limits of the Village.

The Michigan Department of Transportation has estimated the cost of the project to be \$4,564,500 for alteration, reconstruction and relocation.

Through March 31, 2005, the Village received and expended \$3,729,611 of the grants.

STATE TRANSPORTATION ECONOMIC DEVELOPMENT

The Village has been awarded a State Transportation Economic Development grant in the amount of \$375,000. The grants require a local match in the amount of \$93,750. The project will consist of reconstruction of Michigan, Mercury and Paul Bunyan streets a total estimated cost of \$468,750.

NOTE L - RISK MANAGEMENT

The Village is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Village manages its liability workers' compensation and property risk, by participating in Michigan Municipal Risk Management Authority Liability and Property Pool, a public entity risk pool providing property and liability coverage to its participating members. The Village pays an annual premium for its insurance coverage. The Michigan Municipal Risk Management Authority Liability and Property Pool is self-sustaining through member premiums and provides, subject to certain deductibles, occurrence-based casualty coverage for each incident and occurrence-based property coverage to its members by internally assuring certain risks and reinsuring risks through commercial companies. Settled claims resulting from these risks have not exceeded insurance coverage in any of the past three fiscal years.

NOTE M - CONTINGENT LIABILITIES

Solid-Waste Landfill

The Village was an operator of a municipal solid-waste landfill which was closed in 1987. The Village has not recorded or recognized any costs or liability for the landfill post-closure care requirements. Village engineers have estimated the landfill clean-up cost to be approximately \$350,000.

The Village is seeking financial assistance from the State of Michigan (the landowner) and from Ontonagon County in connection with this matter.

NOTE N - RECLASSIFICATIONS

Certain reclassifications have been made to the 2004 financial statements to conform to the 2005 classifications.

REPORT ON COMPLIANCE AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Honorable President and Members of the Village Council Village of Ontonagon Ontonagon, Michigan

We have audited the financial statements of the Village of Ontonagon as of and for the year ended March 31, 2005, and have issued our report thereon dated September 7, 2005. We conducted our audit in accordance with auditing standards and the standards generally accepted in the United States of America applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the Village of Ontonagon's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Village of Ontonagon's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the audit committee, management and federal awarding agencies and pass-through entities. However, this report is a matter of public record and its distribution is not limited.

REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Honorable President and Members of the Village Council Village of Ontonagon Ontonagon, Michigan

Compliance

We have audited the compliance of the Village of Ontonagon with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended March 31, 2005. The Village of Ontonagon's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the Village of Ontonagon's management. Our responsibility is to express an opinion on the Village of Ontonagon's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Village of Ontonagon's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the Village of Ontonagon's compliance with those requirements.

In our opinion, the Village of Ontonagon complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended March 31, 2005.

Internal Control Over Compliance

The management of the Village of Ontonagon is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the Village of Ontonagon's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with applicable requirements of laws, regulations, contracts and grants that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over compliance and its operation that we consider to be material weaknesses.

This report is intended for the information of the audit committee, management and federal awarding agencies and pass-through entities. However, this report is a matter of public record and its distribution is not limited.

COMMENTS AND RECOMMENDATIONS LETTER

Honorable President and Members of the Village Council Village of Ontonagon Ontonagon, Michigan

In connection with our audit of the financial statements of the Village of Ontonagon, Michigan, for the year ended March 31, 2005, the following concerns regarding the accounting records, procedures, and internal accounting control structure came to our attention and are presented for your consideration.

Our comments are based upon conditions noted during our audit and are not intended to be all inclusive. These comments are submitted as constructive suggestions to assist you in strengthening controls and procedures.

Insured Deposits

We noted approximately forty-four percent (44%) of the Village's deposits are insured by the Federal Deposit Insurance Corporation (FDIC). The Village has determined that because of the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all bank deposits. In addition, the laws of the State of Michigan do not provide for collateralization of bank deposits. As a result, the Village evaluates each financial institution it uses and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

We would like to thank the administrative staff for the excellent cooperation we received during our audit. We appreciate the opportunity to present these comments and recommendations for your consideration and we are prepared to discuss them at your convenience.

This report is intended solely for the use of management and the governmental regulatory agencies and should not be used for any other purposes.

Bruce A. Rukhila, CPA, PC
